Personal Profile

A highly motivated and enthusiastic individual with a strong passion for technology, with 2 decades worth of customer service experience from different sectors. Moving across the technology field and into the world of programming has led me to enrol onto the trilogy front end web development bootcamp which covers HTML, CSS JavaScript and React and on completion a certificate will be achieved.

Technical Skills

Frontend: HTML, CSS, JavaScript, React, NodeJS

Version Control: Git, GitHub

Experience

Front End Developer Trainee

As a trainee frontend developer, worked in an agile environment attending stand-ups on project progress. Working on a number of smaller projects learning new technologies in the process. Created an application with ReactJS which used a number of APIs to retrieve data from a users search displayed on a polished looking page. Used Git and GitHub for version control to track any changes to code, working on branches as well as the main branch. JavaScript - OOP, data types, functions and unit testing

Education and Training

Nov 22 – March 23 Trilogy Frontend Web Development Bootcamp Certificate

Covering all aspects of HTML, CSS, JavaScript, jQuery, React

Projects

GlobeTrotters

GitHub: <https://github.com/thomasptharakan/globetrotters>

URL: <https://theglobetrotters.netlify.app>

A one stop shop, aggregating data where users are able to take in important information to plan the journey ahead. Currently using API data to populate covid data as well as images, population and country capital information.

ToWatchIt

GitHub: <https://github.com/thomasptharakan/ToWatchIt>

URL: <https://thomasptharakan.github.io/ToWatchIt/>

The main functionality of our application is adding the desired movies to your movie list and watch them in your free time. The app will run in the browser where the HTML and CSS is dynamically created using JavaScript.

Weather Dashboard

GitHub: <https://github.com/wmohammad83/weather-dashboard>

URL: <https://wmohammad83.github.io/weather-dashboard/>

The aim of this project was to create an application where a user could search for the weather in a particular location. The data it retrieves comes from the open weather API and displays it in the browser.

Employment History

Sep 2021 – Present **ICT Cluster Manager**
Oasis Community Learning

Responsible for the smooth running of 4 academies ensuring technicians are onsite and completing service tickets in a timely manner within SLAs.

Working closely with project managers and senior managers to complete project work to achieve the required outcome.

Working with technologies such as Meraki, Jamf Pro and papercut, imaging desktops and laptops using WDS and SCCM to install applications such as Office 365. Assisting with desk moves and patching in the relevant network ports in the server cabinet as well as providing exceptional customer service and support teaching staff and students.

July 2019 – Oct 2021 **IT Technician**
Oasis Community Learning

Supporting teaching staff and students with day to day IT activities (desktop support/printing), supporting users within a Microsoft/Apple environment. Imaging and configuring desktop and laptop devices for use within the academies using WDS and SCCM. Assisting staff/students with Apple iPad devices managed by Jamf, desktop moves and network patching. Take part in various project work including an academy move and setup and project Horizon. During the first lockdown in the covid-19 pandemic, worked on the 1st line to support students, parents and teachers for online learning.

08/18 – 07/19 **Field Engineer**
Daisy IT Services Ltd

07/15 - Present **Locum Dispensing Optician**
Specsavers, Asda, Independent Opticians

02/11 – 07/15 **Dispensing Optician**
Specsavers, Rochdale

11/10 – 02/11 **Locum Dispensing Optician**
Asda, Tesco, Independent Opticians

06/10 – 10/10 **Dispensing Optician**
Specsavers, Bolton

08/07 – 05/10 **Dispensing Optician**
D&A Opticians, Manchester Arndale Centre

08/06 – 08/07 **Pre-Reg Dispensing Optician**
Specsavers, Morley

Hobbies: Occasional console gaming (Xbox), keeping fit and healthy, learning about new technologies particularly networking. I am also into home automation where I have setup Apple HomeKit to control lights, heating using sensors available on the market.

Additional information: I have a full driving licence and own a car.
